Seasonal Influenza-Associated Hospitalizations Report
MMWR Week 6
02/05/2023 – 02/11/2023**

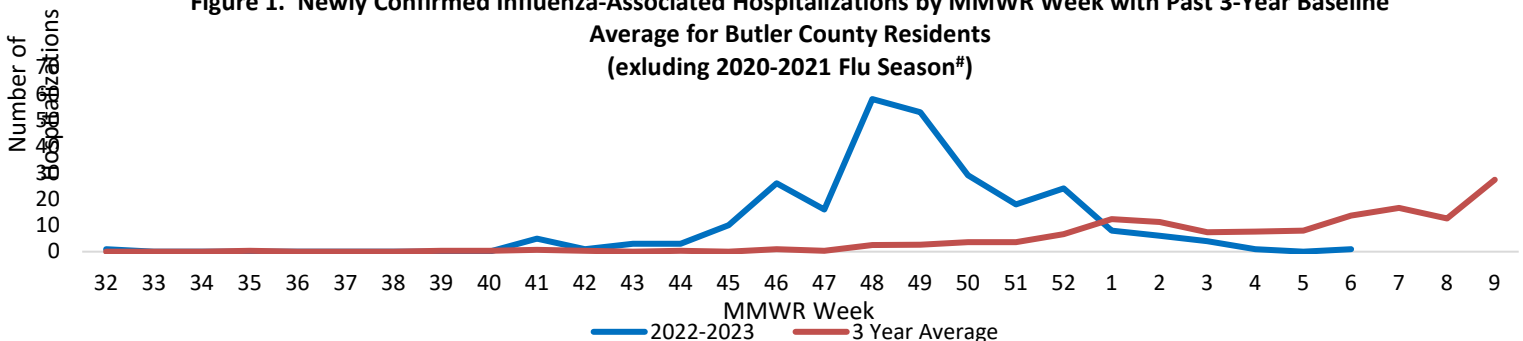

**Weekly Influenza-Associated Hospitalizations Activity Summary:
Butler County (MMWR Week 6, ending on 02/11/2023)**

Butler County saw 1 influenza-associated hospitalizations for the MMWR week ending 02/11/2023. The 3-year average for this time of year is 13.7 influenza-associated hospitalizations. Receiving the influenza vaccine is the best way to reduce the chance of illness and complications, including those resulting in hospitalization and death.

Sources of Influenza Surveillance Data

Influenza-associated Hospitalizations (ODRS): Influenza-associated hospitalizations are reported to local health departments for entry into the Ohio Disease Reporting System (ODRS). Hospitalizations can be used as an indicator of the severity of illness during a particular influenza season. This condition became reportable in 2009.
